

Insert Code

Davide Grimaldi

1 Introduction

Insert code in L^AT_EX

1.1 My Python program

```
1000 #python example
      a = 10
1002 b = 12
      \n
1004 if a < b :
      print("Greater number is : {}".format(b))
1006 else:
      print("Greater number is : {}".format(a))
```

app.py

2 Conclusion

Brief commands to Insert code.
